

MRUDULA JOSHI

MCA STUDENT | PYTHON, WEB & AI APPLICATION DEVELOPMENT

mrudulajoshi55@gmail.com | +91 7798746832 | Palghar, Maharashtra | linkedin.com/in/mrudula-joshi25 | github.com/Mruj12

PROFESSIONAL SUMMARY

MCA student with hands-on project experience in web, Python, Django, AI/LLM applications, and growing data analytics skills. Brings analytical problem-solving, attention to detail, communication, teamwork, and a continuous-learning mindset. Seeking an entry-level technology opportunity with Virtusa and eager to contribute while continuing to learn.

STRENGTHS AND LEARNING FOCUS

Transferable Strengths: Analytical Problem-Solving | Attention to Detail | Communication | Team Collaboration | Learning Agility
Learning Focus: Software Development Life Cycle (SDLC) | Manual Mobile Testing | Functional Testing Fundamentals

TECHNICAL SKILLS

Programming:	Python, Java (basic Swing and AWT)
Web Development:	HTML5, CSS3, Flexbox, CSS Grid, Media Queries, Responsive Design, JavaScript
Backend and Database:	Django, SQL, SQLite, MySQL, MongoDB
AI and LLM:	LLM Applications, RAG, LangChain, Hugging Face, FAISS, OCR
Data Analytics:	Excel, Power BI (learning), Power Query, Pandas, SQL, Data Cleaning, Data Visualization
Courses and Training:	Python Development — Quastech; Cybersecurity Bootcamp
Tools:	Git, GitHub, VS Code

SELECTED PROJECTS

- 1. FinSight AI — Corporate Travel Expense Analysis System**

 - Developed an AI-based corporate travel expense analysis system combining Python data processing with LLM and RAG technologies to analyze travel and expense information.

Technologies: Python, Streamlit, Hugging Face, LangChain, FAISS, RAG, Pandas, OCR
- 2. PDF Chatbot**

 - Developed an AI-powered chatbot that enables users to interact with PDF documents and retrieve relevant information through document processing and retrieval techniques.

Technologies: Python, LLM, RAG, Embeddings, PDF Processing, Vector Search, Streamlit
- 3. SmartHire — Job Portal**

 - Developed a job portal with recruiter job posting, candidate search and application flows, role-based authentication, Django templates, and database integration.

Technologies: Python, Django, HTML5, CSS3, JavaScript, SQLite
- 4. Nirvaa Botanics — Skincare E-Commerce Website**

 - Built a responsive e-commerce frontend with product filtering, product details, shopping cart, quantity controls, demo checkout, mobile navigation, newsletter signup, and an announcement bar.

Technologies: HTML5, CSS3, Vanilla JavaScript
